Training for younger kids

### More about me

I have really enjoyed being part of the handball family as the IHF Treasurer during the last four years. Our great sport is growing all over the world and more countries than ever are being part of the different IHF events.

I live just outside Stockholm, Sweden, with my husband and two girls. I am currently working as Director at the Swedish Patent office.

I have been involved in our local Handball Club as trainer for our two daughters.

During the Pandemic I helped finance and build a new training hall for the club, to enable the possibility for more youth of training Handball.
