### SUMMARY

I have taken an unorthodox path to the business sector, but for good reason: I have been a professional handball player. Some highlights of my career include: 179 appearances with the Hungarian National Handball Team, 4th place at both the Athens and London Olympics, Team Captain of the Hungarian National Team, and several appearances at both the European Championships and the World Championships. Besides my athleticism, I was appointed to the Hungarian Olympic Committee's Board of Athletes since 2017 and have been a member of the Hungarian Sports Innovation Committee since 2009.

### SKILLS

Communication Skills, Creativity, Influence, Motivational Skills, Openness to New Ideas, Analytical Skills, Self-improvement, Precision

### EXPERIENCE

#### Director

*Yellow Road System*

I am a co-founder of Yellow Road System, a Hungarian company that specialises in comprehensive psychological and psychical screening of young athletes so that parents can ensure successful careers for their children.

#### Official Partner

*RISE International*

RISE is defined as a Human Development System, and as such, the solutions it offers are completely unique. The main task of the system is to define the personality of an individual and their resulting behaviour. Based on its assessment of individuals, RISE can also define the same information at the group level. Thus, RISE is a deep analytical tool for assessing teams, companies, organisations, target groups, countries; essentially, groups defined in any way.

#### Consultant

*Mentors & Partners Group*

For international companies, M&P primarily provides organisational development, recruitment/headhunting, and market research solutions; we also provide management, sales, and teambuilding trainings. For Hungarian-owned companies, we offer complex, unique "business mentoring" programmes, a term we coined 11 years ago to represent our comprehensive approach that has since ensured the success of several domestic companies.
